

ProntoForms Integrates Laser Measurement Tool Spike from ikeGPS

Integrated solution automatically adds measurement data to forms; improving productivity

OTTAWA, Ont. - June 06, 2016 - ProntoForms (TSXV: PFM), the leading provider of mobile data collection and analytics platforms for enterprises and small to medium sized businesses, today announced the release of new functionality to integrate the ProntoForms solution with Spike, a smart laser measurement tool offered by ikeGPS.

ProntoForms users can now attach a Spike device to their iPhone or iPad, easily capture area and linear measurements, have the data automatically embed into their mobile forms, and take advantage of all the output and connectivity capabilities that the ProntoForms solution offers. This makes it easy for remote workers to quickly complete and submit detailed customer estimates, work orders, and property inspection reports directly from the field - without climbing ladders and using tape measures.

Users can collect as many measurements as required and add other necessary information such as estimated costs, and customer signatures. Completed forms, including all photos and measurements, can be submitted in real-time to customers as PDFs, and to back-office systems with just the touch of a button.

“Thousands of field service workers measure something every day,” says Jeff Ross, Senior Vice President of New Market Development at ikeGPS. “This new integration dramatically reduces the time it takes for ProntoForms users to measure homes, office buildings, structures, and other hard-to-reach objects on-site, enabling them to get to their next appointment quicker. We’re excited to partner with the North American market leader in mobile forms.”

“The integration between ProntoForms and a market leader like ikeGPS demonstrates early success of our new partner and integration strategy,” says Mansell Nelson, Senior Vice President of Business Development at ProntoForms. “We’re the recognized leader in the North American mobile forms market, which has an estimated 42 million subscribers, and believe that our partnership strategy, alongside our direct and channels sales, will help accelerate our market share growth through connected and embedded solutions.”
